Description

The drum collectors is made of high resistance stainless steel to increase mechanical resistance to be used at high speeds of rotation without triggering dangerous vibrations.

This collector can be used only with EasyDrum rotation systems by Linari Engineering.

This kind of collector is suitable to produce single aligned fibers and to create tissues with few contact point with collector for an easy handling during detachment.

Dimensions

Outer wire diameter	80 mm
Grip diameter	10.0 mm
Wire length	120 mm
Wire diameter	3.0 mm
Wire number	12
